DETAILED ACTION

Claim Rejections - 35 USC § 112

1. Claims 39-97 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 39-97 are replete with antecedent basis problems making the claims difficult to understand and examine properly with so many as to make it difficult to list them all.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 39-97 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-103 of U.S. Patent No. 6,739,774. Although the conflicting claims are not identical, they are not patentably distinct from each other because while the claim language is slightly different between the application and the patent, the patent includes either directly all of the limitations

cited with the addition of further limitations or inherently provides those limitations by the structure that is claimed such as the method claims of the present application.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Roylance et al, Lim, Butler, Susel, Bullister, Leman, and Furuki et al teach various expandible and contractible keyboard structures.
